

# ABC Forensic Services Laboratory

## Firearms Department

**Report Date:** April 7, 2017

**Agency:** Springfield Police Department

**Laboratory Number:** L17-01234

**Victim:** John Doe

### EVIDENCE

### RESULTS

**Item 3** - One (1) cartridge case headstamped "9MM LUGER" collected from bedroom floor near bed

The item was physically and microscopically examined. Marks of value were found, and it was concluded that the item may be suitable for identification with other firearms related evidence.

The item was entered into the National Integrated Ballistics Integration Network (NIBIN). In the event that a potential correlation is developed, your agency will be notified.

**Item 7** - One (1) projectile collected from John Doe at autopsy

Item 7 was examined, weighed, and measured to determine caliber. The caliber class of Item 7 was determined to be 9mm.

The item was physically and microscopically examined. Marks of value were found, and it was concluded that the item may be suitable for identification with other firearms related evidence.
