

Test Your Knowledge: Trace Evidence Answer Key

Test Your Knowledge: Trace Evidence

Across:

2. Characteristics that can associate evidence with a common source
4. Added materials which are placed in, or fragmented by, an explosive
7. Structure that anchors a hair to a follicle
8. Collective term for twines and ropes made from textile fibers and yarns
10. Characteristics large enough to be perceived without magnification
11. Fuel or oxidizer intentionally used to initiate or spread a fire

13. Association of items that demonstrate they were once joined (2 wds.)
15. Thermal fragmentation of a substance
17. Extremely long, continuous, textile fiber
18. Non-volatile portion of paint
19. Chemical compound, metal, or mixture capable of producing intense heat
20. Characteristics too small to be perceived without magnification

Down:

1. Inorganic product of fusion that has been cooled to a rigid condition
3. Ruins or rubble which results from the burning of materials
5. Any substance added in a small quantity to improve properties
6. Means and methods for characterizing fractured surfaces
9. Main structural component of hair
12. Group, set, or kind sharing common attributes
14. Science of the relationship between heat and other forms of energy
16. Material of established origin with certified properties
