# **National Institute of Justice**

## Forensic Science Research and Development Symposium

## American Academy of Forensic Sciences 77th Annual Scientific Conference

The National Institute of Justice (NIJ) Forensic Science Research and Development (R&D) Symposium is an open meeting delivered through NIJ's Forensic Technology Center of Excellence (FTCOE) where attendees can learn about NIJ-funded research across a variety of forensic science areas. You can register to attend the Symposium in person or virtually; however, American Academy of Forensic Sciences (AAFS) conference registration is not necessary to attend. Feel free to stop by to listen to specific presentations and view posters or stay all day and learn about the diverse NIJ forensic science R&D portfolio.

More details and registration information can be found here: <u>https://forensiccoe.org/event-2025-research-development-symposium/</u>

### Agenda—Tuesday, February 18, 2025

The podium presentations will take place from 8:30 a.m. EST to 5:00 p.m. EST in Meeting Rooms 309/310 at the Baltimore Convention Center. A Q&A session for each presenter will directly follow their presentation. Please note that all times are listed in Eastern Standard Time (EST).

Start Time (EST)	End Time (EST)	Session Title			
8:30 a.m.	8:40 a.m.	Welcome and Opening Remarks Lucas Zarwell, Office of Investigative and Forensic Sciences, National Institute of Justice			
Session I—T	Session I—Trace Evidence/Fire Investigation/Physics and Pattern				
Moderated by	Noderated by NIJ Program Manager Gregory Dutton				
8:40 a.m.	9:05 a.m.	Assessment of the Added Value of New Quantitative Methodologies for the Analysis of Surface Soils in Forensic Soil Comparisons <i>Kelly A. Meiklejohn, North Carolina State University</i>			
9:05 a.m.	9:30 a.m.	The Influence of Soils and Chlorinated and Non-Chlorinated Agitated Water on Surface-Enhanced Raman Spectroscopic Analysis of Artificial Dyes on Hair Dmitry Kurouski, Texas A&M University			
9:30 a.m.	9:55 a.m.	Experimental Study of Heat Transfer and Fire Damage Patterns on Walls for Fire Model Validation Matthew J. DiDomizio, Fire Safety Research Institute			
9:55 a.m.	10:20 a.m.	Evaluation of the Occurrence and Associative Value of Non-Identifiable Fingermarks on Unfired Ammunition in Handguns for Evidence Supporting Proof of Criminal Possession, Use, and Intent David A. Stoney, Stoney Forensic, Inc.			
10:20 a.m.	10:35 a.m.	BREAK			

Woderated by NIJ Program Manager Rachel Wendt       Optimizing Bruise Detection in Forensic Imaging: A Comparative Analysis of         10:35 a.m.       11:00 a.m.       Object Detection Models         Mehrdad Ghyabi, George Mason University       Using Artificial Intelligence: Deep Learning for Human Decomposition Staging         11:00 a.m.       11:25 a.m.       11:50 a.m.       Deep Learning Empowers Fine-Grained Population Affinity Estimation with         11:25 a.m.       11:50 a.m.       Deep Learning Empowers Fine-Grained Population Affinity Estimation with         11:50 a.m.       12:15 p.m.       Decedent Residual Odor Detectable by Human Remains Detection (HRD)         11:50 a.m.       12:15 p.m.       LUNCH BREAK – On Your Own         Session III—Seized Drugs and Toxicology       Woderated by NIJ Program Manager Magan Chambers         12:5 p.m.       1:50 p.m.       Identifying High-Quality Aptamers for Drug Detection         1:50 p.m.       2:15 p.m.       I:50 p.m.       Identifying High-Quality Aptamers for Drug Detection         1:50 p.m.       2:15 p.m.       Sign Ann Musah, Louisiana State University       Chamabis-Use Biomarkers in Finagerprint Residues Using Mass Spectrometry         1:50 p.m.       2:40 p.m.       3:05 p.m.       BREAK       Sign Ann Musah, Louisiana State University         Chomatographic Interferences That Can Inflate the Levels of Δ9-THC in Cannabis Samples       Cannabis Samples	Start Time (EST)	End Time (EST)	Session Title

## **Poster Session**

The poster presentations will be from 5:00 p.m. EST to 6:30 p.m. EST in Meeting Rooms 307/308 at the Baltimore Convention Center. Self-guided tours will begin at 12:00 p.m. EST, and the meeting room doors will remain open until 7:00 p.m. EST.

Posters indicated with an asterisk (\*) will be available virtually only. More details and information can be found here: <u>https://forensiccoe.org/event-2025-research-development-symposium/</u>

#### **Poster Presentations**

Quantitative Matching of Forensic Evidence Fragments of Metals, Ceramics and Plastics Using Fracture Surface Topography and Statistical Learning Ashraf Bastawros, Iowa State University

Application of Particle-Correlated Raman Spectroscopy (PCRS) for the Forensic Examination of Soils

Brooke W. Kammrath, University of New Haven and Henry C. Lee Institute of Forensic Science

Using Ultrasonic Pulse Velocity to Assess Fire Damage in Drywall Maria Binte Mannan, University of Maryland

Advancing the Understanding of 3D Imaging for Firearms Identification\* *Melissa Nally, Houston Forensic Science Center* 

Assessing the Reliability of Fire Pattern Indicators in Wildland Fire Investigations: A Field Study\* Raphael Ogabi, Worcester Polytechnic Institute

Analysis of Oil-Based Ignitable Liquid Residues on Wood and Fabric Debris by GC-MS and DART-MS

Mengliang Zhang, Ohio University

Interoperability of Firearm Toolmark 3D Topography Measurements *Xiaoyu Alan Zheng, National Institute of Standards and Technology* 

Improving and Evaluating Computed Tomography and Magnetic Resonance Imaging in the Investigation of Fatalities Involving Suspected Head Trauma Natalie Adolphi, New Mexico Office of the Medical Investigator

Skeletal Trauma in Forensic Anthropology: Improving the Accuracy of Trauma Analysis and Expert Testimony Amanda Agnew, The Ohio State University

Pre-Grouping of Commingled Human Skeletal Remains by Elemental Analysis Matthieu Baudelet and Kristen Livingston, University of Central Florida

Initial Assessments of Relic DNA Removal from Host- and Environmentally Sourced Microbiome Evidence Zachary Burcham and Emily Cantrell, University of Tennessee, Knoxville

Eggs-ploring the Volatiles Profiles of *L. sericata* Eggs for Postmortem Interval Determination *Alexa Figueroa, Louisiana State University* 

Improving Identification of Unknown American Indians and Hispanic/Latinx Americans Kelly Kamnikar, The University of New Mexico Exploring the Potential of Amino Acid δ2H Analysis as a Forensic Tool to Identify Region of Origin *Christy J. Mancuso, The University of New Mexico* 

GIS Application for Building a Nationally Representative Forensic Taphonomy Database *Katherine Weisensee, Clemson University* 

What a Trip! Investigating the Stability of Psilocybin and Psilocin Infused within Complex Edible Matrices

Benedetta Garosi, Louisiana State University

Detecting Fentanyl Analogs in Counterfeit Pharmaceuticals by Surface-Enhanced Raman Spectrometry Bruce McCord, Florida International University

Chiral Separation and Quantification of Methamphetamine in Whole Blood *William Naviaux, University of Wisconsin–Madison* 

Multimodal Raman Spectroscopy and Mass Spectrometry Analysis of Synthetic Drugs in Blood Plasma Utilizing Nanoparticle-Decorated Porous Substrates Rajesh Sardar, Indiana University Indianapolis

Potency Testing of Synthetic THC Isomer-Infused Edibles Using Ultra-High-Performance Liquid Chromatography Diode Array Detector with Optional Electrospray Ionization Time-of-Flight Mass Spectrometry

Liguo Song, Western Illinois University

Enhancing Field Detection of Fentanyl: A Novel Pre-Concentrator for Ion Mobility Spectrometry Using Silicon Nanowires\* Galpayage Dona Thouli Lochana Jayawardana, Florida International University

Navigating the Unknown: A Comparative Analysis of Targeted and Non-Targeted Approaches for Detecting New Psychoactive Substances in Human Matrices *Akshita Verma, Florida International University* 

Rapid Response to Novel Psychoactive Substances (NPS) Identified in U.S. Recreational Drug Markets Sara Walton and Alex Krotulski, The Center for Forensic Science Research & Education

Transfer, Persistence and DNA Source Attribution of Trace Biological Material in Digital Penetration Assault Cases

Erin Hanson, University of Central Florida

Recovery of Multiple Analytes from Biological Samples for Forensic Application *Arati Iyengar, West Virginia University* 

Applications of the Genital Microbiome in Detecting Sexual Contact Andrea Ramirez Torres, Florida International University

Assessment of Promega's PowerSeq 46GY Through Testing of the Standard and the Micro Flow Cells

Elisa Wurmbach, New York City Office of Chief Medical Examiner
